

LIST OF PUBLICATIONS FOR 2017 IN “PROCEEDINGS OF THE NATIONAL ACADEMY OF SCIENCES OF BELARUS. PHYSICS AND MATHEMATICS SERIES”

MATHEMATICS

Dirvuk Y. V. Approximate computation of integrals with the singularities on integration interval ends	№ 1. P. 29–37
Egorov A. D. Approximate formulas for evaluation of one-class functionals of the Poisson process	№ 1. P. 7–13
Gal'mak A. M., Rusakov A. D. Polyadic operation of special type	№ 2. P. 44–51
Khudyakov A. P., Trofimuk A. P. Interpolation Hermite – Birkhoff-type formulas with respect to the algebraic and trigonometric systems of functions with one special node	№ 1. P. 14–28
Kopats D. J., Matalytski M. A. Non-stationary distribution of the probability states of the Markov network with infinite-server queuing systems operating at high load	№ 1. P. 63–69
Korzyuk V. I., Nguyen Van Vinh. Solving the problem for the fourth-order nonstrictly hyperbolic equation with double characteristics	№ 1. P. 38–52
Kot M. G. Asymptotics behavior of the vector-functions of operators approximating the differential equations with δ -shaped coefficients	№ 3. P. 15–26
Kuzmich A. V., Hryn A. A. Construction of the systems with a perturbed linear center having no more than one limit cycle	№ 3. P. 40–48
Levakov A. A., Zadvorny Y. B. Existence of measurable adapted selectors of set-valued functions	№ 1. P. 70–78
Lipnitski V. A., Sergey A. I. On the stabilization of the number of orbits of high-rank Cameron matrices	№ 2. P. 60–70
Minchenko L. I., Berezhnov D. E. Pseudo-lipschitzian continuity of solution mappings in parametrical optimization problems	№ 2. P. 36–43
Palukha U. Yu. Statistical tests based on entropy estimates for checking the hypotheses of the uniform distribution of a random sequence	№ 1. P. 79–88
Rovba E. A., Kozlovskaya N. Yu. Approximation of $ \sin x $ by rational operators of Fejér type	№ 3. P. 27–39
Shved O. L. Considering the increase in elastic anisotropy of triclinic elastic-plastic material	№ 1. P. 89–97
Stolyarchuk I. I. Solution of the mixed problems by the method of characteristics for the wave equation with the integral condition	№ 1. P. 53–62
Volkov V. M., Hureuski A. N. Spectral-like resolution of finite-difference schemes for the heat conduction equation	№ 3. P. 7–14
Yanovich L. A., Ignatenko M. V. To the theory of Hermite – Birkhoff interpolation of nonlinear ordinary differential operators	№ 2. P. 7–23
Yukhimuk M. M. Homogeneous Riemann boundary value problem with meromorphic coefficients for infinitely connected domains	№ 2. P. 24–35
Zhuk E. E. Statistical assignment of realizations of non-stationary time series to the fixed trend models	№ 2. P. 52–59

PHYSICS

Balykin I. V., Zheleznyakova T. A., Ryzhevich A. A. Power changes in different-type light beams after passing through the layers of different-thickness scattering medium	№ 2. P. 91–100
Baranova M. S., Skachkova V. A., Stempitsky V. R., Hvazdousky D. C. Band structure of the layered graphene–ZnO, graphene–ZnS heterosystems: quantum-mechanical simulation	№ 3. P. 99–107
Baryshevsky V. G., Tikhomirov V. V. Crystal applications in high energy physics for new phenomena observation and acceleration technology development	№ 4. P. 20–32
Belyi V. N., Khilo P. A., Kazak N. S., Khilo N. A. Low-frequency backward acousto-optic scattering of Bessel light beams	№ 3. P. 78–86
Buganov O. V., Zamkovets A. D., Ponyavina A. N., Tikhomirov S. A., Pham Hong Minh, Nguyen Thanh Binh, Nguyen Dai Hung. Spectral-temporal dynamics of transient absorption of multilayer periodic plasmonic nanostructures	№ 2. P. 82–90
Cherkas S. L., Kalashnikov V. L. Matter creation and primordial CMB spectrum in the inflationless Milne-like cosmologies	№ 4. P. 88–97

Korjik M. V. Glass-ceramic scintillation materials for neutron detection	№ 4. P. 67–71
Krylova N. G., Grushevskaya H. V., Red'kov V. M. First-order phase transition dynamics in the Finsler configuration space of the Langmuir monolayer	№ 3. P. 66–77
Kurochkin Yu. A. Interpretation of the free motion of particles in the Lobachevsky space in the term of the scattering theory	№ 3. P. 49–55
Kurochkin Yu. A., Harkusha S. N., Kulchitsky Yu. A., Russakovich N. A. Quark in the external gluon field of magnetic type: coherent states	№ 4. P. 39–43
Kuvshinov V. I., Bagashov E. G., Shaparau V. A., Kuzmin A. V. New experimental and theoretical tasks in modern particle and nuclear physics	№ 4. P. 51–66
Lebiadok Y. V., Kabanau D. M. Amplified luminescence and auger recombination in GaInAsSb-based leds in the temperature range of 10–300 K	№ 3. P. 118–126
Lednický R., Potrebenikov Yu. K. New JINR projects and cooperation with belarusian scientists	№ 4. P. 15–19
Le Thi Dieu Hien, Kuten S. A., Khrutchinsky A. A. Initial ionization distribution in the active volume of the ionization chamber	№ 1. P. 111–119
Levchuk E. A., Makarenko L. F. Analysis of the electronic structure of an electrically induced quantum dot in the external magnetic field	№ 3. P. 87–98
Makarenko L. F., Lastovskii S. B., Yakushevich H. S., Moll M., Pintilie I. Injection annealing of radiation-induced interstitial defects in boron doped silicon crystals	№ 3. P. 108–117
Nizovtsev A. P., Pushkarchuk A. L., Kuten S. A., Pushkarchuk V. A., Kilin S. Ya., Luzanov A. V., Zhi-kol O. A. Robust electronic-nuclear NV- ¹³ C spin systems in the diamond for quantum technologies	№ 1. P. 98–110
Pankov A. A., Serenkova I. A., Tsytrinov A. V., Bednyakov V. A. Prospects for identifying new physics scenarios at CERN LHC	№ 4. P. 33–38
Pankov A. A., Serenkova I. A., Tsytrinov A. V., Bednyakov V. A. Search and identification of effects of extra spatial dimensions in lepton pair production at LHC	№ 4. P. 44–50
Sikorin S. N., Kuzmin A. V., Mandzik S. G., Polazau S. A., Hryharovich T. K., Zaytsev P. A., Tukhvatulina Sh. T., Galev I. E., Bakhin A. N., Diyakov E. K., Izhutov A. L., Alekseev V. E., Keiser D., Bolshinsky I., Gohar Y. In-pile and out-of-pile tests and research on fast critical assemblies of high density uranium zirconium carbonitride LEU fuel	№ 4. P. 104–112
Silenko A. J. Quasi-magnetic resonance in storage ring electric-dipole-moment experiments	№ 4. P. 79–87
Tarutin I. G., Baranovski A. A. Modern technical state of radiotherapy and nuclear medicine in the Republic of Belarus ways of their next evolution	№ 4. P. 113–119
Tenchini R. High energy frontier during the next twenty years	№ 4. P. 9–14
Tikhomirov S. A., Lucchini M., Baganov O. V., Auffray E., Korjik M. V., Kozlov D., Nargelas S., Tamulaitis G., Vaitkevicius A., Akira Yoshikawa. Free carriers dynamics in heavy scintillation materials with garnet structure	№ 4. P. 72–78
Veko O. V., Ovsyuk E. M., Red'kov V. M. Cox nonrelativistic particle of intrinsic structure in the electric field: analysis in the Lobachevsky space	№ 2. P. 71–81
Veko O. V., Voynova Ya. A., Ovsyuk E. M., Red'kov V. M. Cox particle in the applied magnetic field: analysis in Lobachevsky space	№ 3. P. 56–65
Vyblyi Yu. P., Leonovich A. A. Interacting scalar field in the theory of gravity	№ 4. P. 98–103

INFORMATICS

Doudkin A. A., Pertsau D. Yu. Compression algorithm of the hyperspectral data of Earth remote sensing	№ 1. P. 120–126
Levin G. M., Rozin B. M. Optimizing the output of product batches and intensity of their manufacture under random demand	№ 2. P. 110–118
Poljakov A. S. Error correction when transmitting information by a parity check of binary matrix coordinates	№ 2. P. 101–109

SHORT COMMUNICATIONS

Chymakov F. V., Vasilets S. I. Explicit solution of one-type integral Volterra equation on the symmetric interval with a sum-difference kernel	№ 2. P. 119–124
---	-----------------

SCIENTISTS OF BELARUS

Vladimir Nikolaevich Belyi (To the 70 th Anniversary)	№ 4. P. 120–121
Dostanko Anatolii Pavlovich (To the 80 th Anniversary)	№ 3. P. 127–128
Kilin Sergei Yakovlevich (To the 65 th Anniversary)	№ 2. P. 125–126
Orlovich Valentin Antonovich (To the 70 th Anniversary)	№ 1. P. 127–128
